TITLE Selected Nanny Child Care Bibliography.
PUB DATE 90
NOTE 14p.
PUB TYPE Reference Materials - Bibliographies (131)

EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS *Child Caregivers; *Child Care Occupations; Employment Qualifications; *Household Workers; Occupational Information
IDENTIFIERS *Home Child Care; *Nannies

ABSTRACT

This bibliography on nanny child care contains approximately 180 references to material about nannies, mother's helpers, au pairs, and governesses. The bibliography is organized by the categories of newspaper articles, journal articles, newsletter articles, books, and audiovisual materials. The items are drawn primarily from U.S. sources, but some Canadian, Australian, and British information is included. Material that deals primarily with the child care aspect of the nanny profession is excluded. The bibliography is intended to help teachers, placement agencies, families, nannies, and people considering the nanny profession. Most of the items cited were published between 1981 and 1990, although a few date from the late 1950s and early 1960s. References are not annotated. (LB)

ED 339467

In the past thirty years, the child care field has developed into a profession with many career opportunities for individuals interested in working with young children. One of those career opportunities is for nanny child care.

The nanny profession has a long history dating back hundreds of years in Europe. The nannies employed in this country were primarily employed by wealthy families in the early 20th century. The nanny profession had waned in the early 1970's but has re-emerged as a child care career option because of the child care crises in this country.

Due to this growing demand from families, there has been a proliferation of nanny child care courses and programs. The number of placement agencies involved with referring nannies to families for jobs has also increased tremendously in the past few years. Despite this increase in educational programs and placement agencies, there is not a published list of resources about nannies.

PS 020047

This bibliography includes material about nannies, mother's helpers, au pairs, and governesses. It is a selected bibliography of books, journal articles, newspaper articles, and audio visual material on the nanny profession. It does not include any material that deals primarily with the child care aspect of the profession. There is an abundance of documented material available in this particular area.

The purpose of this bibliography is to help identify works about the nanny profession. The information should be useful to teachers, placement agencies, families, current nannies, and people considering the nanny profession.

The list was compiled from many different sources: online databases including ERIC, Magazine Index, and Newspaper Index; Books in Print, British and Canadian Books in Print; and bibliographies of books and journal articles, etc.
